

Imagine a bird, jet black from beak to tail, flying across the clear sky - that's a crow for you! These birds are quite common and you can spot them almost everywhere in the world. Their bodies are covered with glossy feathers and they have strong, flexible beaks. If you look closely, you'll notice their smart, shiny eyes that seem to be full of curiosity and intelligence.

Now that you know what they look like, let's explore what these clever birds eat. Crows are omnivores, which means they eat both plants and other animals. They are known to eat insects, small animals, seeds, fruits, and even garbage. Yes, you heard it right, these intelligent birds can adapt to eat almost anything available to them!

Speaking of adapting, crows are not just smart eaters but also clever dwellers. They can live in various places, from forests and mountains to cities and farms. Crows usually live in large family groups and build their nests on tall trees or even on buildings. Their lifespan is pretty impressive too, as they can live up to 20 years!

So, how do crows interact with us humans and other animals? Well, crows have a complex relationship with humans; sometimes they are seen as pests, while other times, they help us by eating harmful insects. Crows can also remember human faces and hold grudges, so be nice to them! When it comes to other animals, crows can be both friendly and defensive, but they always look out for each other in their group. In the world of crows, it's all for one and one for all!

**Solve each problem.****Use the article to answer the question.**

- 1) How long can crows live?
 - A. Up to 30 years
 - B. Up to 20 years
 - C. Up to 10 years
 - D. Up to 5 years
- 2) Where might crows build their nests?
 - A. In the water
 - B. Under the sand
 - C. Tall trees
 - D. On the ground
- 3) What kind of eater is a crow?
 - A. Carnivore
 - B. Piscivore
 - C. Omnivore
 - D. Herbivore
- 4) What size groups do crows usually live in?
 - A. Pairs
 - B. Large family groups
 - C. Small family groups
 - D. Alone
- 5) Where can you spot crows?
 - A. On remote islands only
 - B. Only in the rainforests
 - C. Only in Africa
 - D. Almost everywhere in the world
- 6) What color is a crow from beak to tail?
 - A. Black
 - B. Gray
 - C. White
 - D. Brown
- 7) What can crows remember about humans?
 - A. Human houses
 - B. Human voices
 - C. Human clothes
 - D. Human faces
- 8) What type of plants do crows eat?
 - A. Leaves and bark
 - B. Stems and rocks
 - C. Seeds and fruits
 - D. Flowers and grass

Determine if the statements is something the animal would say (W) or it it is not something the animal would say (N).

- 9) "We crows are omnivores, which means we eat both plants and meat."
- 10) "Just because I have feathers doesn't mean I fly. I prefer to walk."
- 11) "I'm strictly a plant-eater, animals are my friends, not food!"
- 12) "My maximum lifespan is around 5 years."
- 13) "We build our homes on tall trees and we can live almost anywhere - from forests to cities."
- 14) "Did you know, I can remember your face and even hold grudges if you're not nice to me?"
- 15) "I refuse to eat any sort of meat. Flowers and berries are my go-to meal."
