

Use addition strategies with place value to solve.

Answers

Ex) $547 + 369 = \underline{916}$

$7 + 9 = 16$

$40 + 60 = 100$

$500 + 300 = \underline{800}$

$\quad\quad\quad 916$

1) $481 - 298 = 183$

1	-	8	=	-7
80	-	90	=	-10
400	-	200	=	200
				183

$$\begin{array}{r} 2) \quad 961 - 868 = \underline{93} \\ \quad 1 - 8 = \underline{-7} \\ \quad 60 - 60 = \underline{0} \\ \quad 900 - 800 = \underline{100} \\ \quad \quad \quad 93 \end{array}$$

3) $36 + 196 = \underline{232}$

6 +	6 =	12
30 +	90 =	120
0 +	100 =	100
		232

4) $373 + 125 = 498$

3 +	5 =	8
70 +	20 =	90
300 +	100 =	400
		498

5) $131 + 437 = 568$

1 + 7 =	8
30 + 30 =	60
100 + 400 =	500
	568

6) $781 + 113 = 894$

1 +	3 =	4
80 +	10 =	90
700 +	100 =	800
		894

7) $950 - 847 = 103$

0 - 7 =	-7
50 - 40 =	10
900 - 800 =	100
	<u>103</u>

8) $451 - 414 = 37$

$1 - 4 = -3$

$50 - 10 = 40$

$400 - 400 = 0$

37

9) $29 + 110 = 139$

9 + 0 =	9
20 + 10 =	30
0 + 100 =	100
	139

10) $461 + 190 = \underline{651}$

$1 + 0 = 1$

$60 + 90 = 150$

$400 + 100 = \underline{500}$

$ 651$

11) $640 - 393 = \underline{247}$

$0 - 3 = -3$

$40 - 90 = -50$

$600 - 300 = \underline{300}$

$\quad\quad\quad 247$

Ex. 916

1. **183**

2. **93**

3. 232

4. **498**

5. **568**

6. **894**7. **103**

8. **37**

9. **139**

10. **651**

11. **247**
