

Use the visual model to solve each problem.

$1 \frac{3}{5} + 2 \frac{4}{5} = ?$

To solve a fraction addition problem one strategy is to shade in the whole amounts first (1 & 2).

Next fill in the fraction amounts ($\frac{3}{5}$ & $\frac{4}{5}$).

When all of the pieces are filled in we can see that $1 \frac{3}{5} + 2 \frac{4}{5} = 4 \frac{2}{5}$
