

Solve each problem.

- 1) The table below show the points Amy scored on a video game each time she played.

| Game # | Points Scored |
|--------|---------------|
| 1      | 148           |
| 2      | 127           |
| 3      | 152           |

After the first 3 games, she took a break and came back the next day and scored 6 times as many points as she had during all the previous games combined. How many fewer points did she score before her break than she scored after her break?

- 2) The table below show the pounds of candy a company sold in the months leading up to October.

| Month     | Pounds of Candy Sold |
|-----------|----------------------|
| June      | 146                  |
| July      | 133                  |
| August    | 118                  |
| September | 153                  |

In October they sold 2 times as many pounds of candy as they did in the previous 4 months combined. How many more pounds did they sell in October than were sold in the previous 4 months?

- 3) The table below shows the number of books Nancy read the first 3 months of school.

| Month | Books Read |
|-------|------------|
| 1     | 21         |
| 2     | 20         |
| 3     | 34         |

If George read 5 times as many books as Nancy, how many more books did George read?

- 4) The table below show the number of play tickets sold (excluding the first week).

| Week | Tickets sold |
|------|--------------|
| 2    | 101          |
| 3    | 144          |
| 4    | 199          |
| 5    | 105          |
| 6    | 127          |

In the first week there were 5 times as many tickets sold as there were in the next 5 weeks. How many more tickets were sold in the first week than in the remaining weeks?
