

Solve each problem.

Answers

- 1) Cody and his friend were buying trick decks from the magic shop for seven dollars each. How much did they spend if Cody bought six decks and his friend bought three decks?
- 2) At the town carnival John rode the ferris wheel two times and the bumper cars seven times. If each ride cost three tickets, how many tickets did he use?
- 3) While shopping for music online, Gwen bought six country albums and three pop albums. Each album came with a lyric sheet and had eight songs. How many songs did Gwen buy total?
- 4) At Luke's Restaurant a group with three adults and seven children came in to eat. If each meal cost six dollars, how much was the bill?
- 5) Rachel was unboxing some of her old winter clothes. She found seven boxes of clothing and inside each box there were three scarves and five mittens. How many pieces of winter clothing did Rachel have total?
- 6) Maria bought six new chairs and two new tables for her house. If she spent five minutes on each piece furniture putting it together, how many minutes did it take her to finish?
- 7) Tiffany was organizing her book case making sure each of the shelves had exactly eight books on it. If she had five shelves of mystery books and five shelves of picture books, how many books did she have total?
- 8) Kaleb bought five boxes of chocolate candy and five boxes of caramel candy. If each box has eight pieces inside it, how much candy did he have total?
- 9) Paige's favorite band was holding a concert where tickets were four dollars each. Paige bought six tickets for herself and her friends and three extra tickets in case anyone else wanted to go. How much did she spend?
- 10) A waiter had four tables he was waiting on, with four women and six men at each table. How many customers total did the waiter have?
