

**Solve each problem.**

- 1) A food company has forty-nine kilograms of food to put into boxes. If each box gets exactly six kilograms, how many full boxes will they have?

- 2) At the carnival, seven friends bought twenty-two tickets. If they wanted to split all the tickets so each friend got the same amount, how many more tickets would they need to buy?

- 3) Victor bought twenty-two pieces of candy to give to three of his friends. If he wants to give each friend the same amount, how many pieces would he have left over?

- 4) A clown needed thirty-four balloons for a party he was going to, but the balloons only came in packs of five. How many packs of balloons would he need to buy?

- 5) An industrial machine can make twenty-five crayons a day. If each box of crayons has nine crayons in it, how many full boxes does the machine make a day?

- 6) Cody has to sell twenty chocolate bars to win a trip. If each box contains seven chocolate bars, how many boxes will he need to sell to win the trip?

Answers

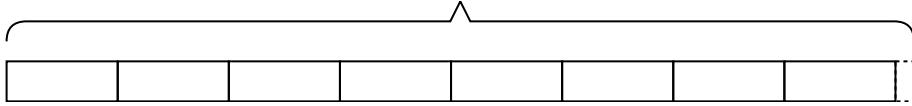

1. _____
