

Use addition strategies with place value to solve.

Answers

Ex) $697 - 387 = 310$

$7 - 7 = 0$

$90 - 80 = 10$

$600 - 300 = 300$

310

1) $795 - 497 = \underline{298}$

$5 - 7 = -2$

$90 - 90 = 0$

$700 - 400 = \underline{300}$

298

2) $757 + 121 = \underline{878}$

$7 + 1 = 8$

$50 + 20 = 70$

$700 + 100 = \underline{800}$

$\quad\quad\quad 878$

3) $586 + 366 = 952$

6 +	6 =	12
80 +	60 =	140
500 +	300 =	800
		952

4) $208 + 594 = 802$

$8 + 4 = 12$

$0 + 90 = 90$

$200 + 500 = 700$

802

5) $370 + 176 = 546$

0 + 6 =	6
70 + 70 =	140
300 + 100 =	400
	546

6) $259 + 418 = 677$

9 +	8 =	17
50 +	10 =	60
200 +	400 =	600
		677

7) $500 + 257 = 757$

$0 + 7 = 7$

$0 + 50 = 50$

$500 + 200 = 700$

757

8) $338 - 234 = 104$

8 -	4 =	4
30 -	30 =	0
300 -	200 =	100
		104

9) $962 - 669 = \underline{293}$

$2 - 9 = -7$

$60 - 60 = 0$

$900 - 600 = \underline{300}$

$ 293$

10) $1 + 192 = \underline{193}$
 $1 + 2 = 3$
 $0 + 90 = 90$
 $0 + 100 = \underline{100}$
 193

11) $507 - 289 = \underline{218}$

$7 - 9 = -2$

$0 - 80 = -80$

$500 - 200 = \underline{300}$

218

Ex. 310

1. **298**

2. **878**

3. 952

4. **802**

5. **546**

6. **677**

7. **757**

8. 104

9. **293**

10. 193

11. **218**
