Solve each problem.

1) A builder used 10 nails to make a desk. Then he built four birdhouses, with each birdhouse using 2 nails. How many nails did he use total?

2) Dave spent $70 on one toy and then he bought six smaller toys that cost $10 each. How much money did he spend total?

3) Frank downloaded a file that was 10 megabytes. He also downloaded two smaller files that were 5 megabytes each. How many megabytes total were the files he downloaded?

4) A big box weighed 10 kilograms. A small box weighed 5 kilograms. If you had one big box and two small boxes how much would they weigh all together?

5) Nancy had already saved up $15. For an allowance she receives $5 each week. How much money will she have total after five weeks?

6) At the arcade Olivia earned 6 tickets playing Skee Ball. Then she played 'Whack-A-Mole' two times and won 2 tickets each time. How many tickets did she win all together?

7) Paige watched a Youtube video that was 8 minutes long. Then she watched three more videos, each one being 2 minutes long. How much time did she spend watching the videos?

8) A thick book had 100 pages. A thin book had 10 pages. If you read the thick book and three thin books how many pages total would you have read?

9) Sam had 30 pieces of candy. Later six of his friends gave him 5 pieces each. How many pieces did he end up with?

10) A gummi worm was 15 calories. A gummi bear was 5 calories. If you ate one gummi worm and three gummi bears how many calories would you have eaten?
