

**Solve each problem.****Answers**

- 1) A pet store had eight snakes. They had the snakes in cages with two snakes in each cage. How many cages did the pet store have?
- 2) Bianca had twelve extra nickels. If she put them into stacks with six in each stack, how many stacks could she make?
- 3) A store sold thirty of their newest toy, 'Silly Beans'. If they sold them to only six customers and each person bought the same amount, how many did each person buy?
- 4) A chef can cook five meals in a minute. If he cooked forty-five meals, how long did it take him?
- 5) Frank was playing the ring toss at the carnival. All together he used twenty-eight rings. If each game you get seven rings, how many games did he play?
- 6) There are twenty students in the school band. If the band instructor put the students into rows with four students in each row, how many rows could he make?
- 7) The roller coaster at the state fair costs three tickets per ride. If you had six tickets, how many times could you ride it?
- 8) Will is helping to put away books. If he has twenty books to put away and each shelf can hold four books how many shelves will he need?
- 9) Ned bought several boxes of books at a yard sale and ended up with twenty-four books total. If each box had six books how many boxes did he buy?
- 10) While playing basketball Team A scored eight points. If each person scored four points, how many people were playing?
- 11) Roger was packing up his old toys. He has thirty-six toys to pack up and can fit four in each box. How many boxes will he need?
- 12) Victor's freezer had eight ice cubes in it. If he had to get ice for two cups, how many pieces should he put in each cup to make them have the same amount?
- 13) For the new school year Faye's mom bought twenty-four glue sticks. If each class needs six glue sticks, how many classes does Faye have?
- 14) There are thirty-six students going on a field trip. If each school van can hold six students, how many vans will they need?
- 15) There are forty people attending a luncheon. If a table can hold five people, how many tables do they need?
