

## Determining Change - One Cost , One Item

Name: \_\_\_\_\_

Solve each problem.

- 1) Ned purchased a bus ticket for \$2.55. If he gave the driver 20 dollars, how much change is he due?
  
- 2) Kaleb went shopping for new sneakers. The price was \$9.45, and he paid with 20 dollars. Determine the change he will get back.
  
- 3) During her visit to the zoo, Nancy bought a souvenir for \$2.85. She paid the cashier 20 dollars. What is the change she should get back?
  
- 4) During her vacation, Olivia bought a beach ball for \$1.85. She gave the vendor 20 dollars. What amount of change should she get?
  
- 5) Lana purchased a notebook for \$3.20. She handed over 20 dollars. How much change is she owed?
  
- 6) At a bakery, Debby bought a box of cupcakes priced at \$3.50. She paid with a 20 dollar bill. How much change should she receive?
  
- 7) Edward bought an ice cream cone costing \$1.80. If he paid with 20, what is his change?
  
- 8) Gwen bought a pencil for \$1.60 and gave the cashier 20 dollars. How much change will she get?
  
- 9) Luke purchased a model airplane kit for \$5.55. He gave the shopkeeper 20 dollars. Calculate the change to be returned.
  
- 10) At the bookstore, Katie bought a magazine for \$3.95 and paid with 20 dollars. Calculate the change she should get back.
