

Determining Change - One Cost , Multiple Items

Name: _____

Solve each problem.

- 1) Billy bought 5 posters at the video game store. If each poster cost \$2.95 and he gave the cashier 20 dollars, how much change should he get back?

- 2) Lana bought 5 bouquets at the florist. Paying 20 dollars for bouquets priced at \$3.85 each, how much change should she receive?

- 3) Bianca bought 2 t-shirts at the clothing store during a big sale. Each t-shirt cost \$4.95 and she paid 20 dollars. What is the amount of change she should receive?

- 4) Haley purchased 2 gift cards. Each card was priced at \$2.40 and she handed over 20 dollars. What should be the amount of her change?

- 5) Frank wants to buy 5 paintbrushes for his art class. The cost of each is \$3.80. If he pays with 20 dollars, what is the amount of change he should receive?

- 6) Rachel bought 4 bags of flour for baking cakes. Each bag costs \$2.00. She paid with 20 dollars. How much change should she get back?

- 7) Adam's dad bought 2 pairs of shoes at the shoe store. If the price per pair is \$5.10 and he pays 20 dollars, how much change should he get back?

- 8) Dave wants to buy 3 toy cars, each priced at \$5.75. He has 20 dollars. How much money will he have left after the purchase?

- 9) Paul goes to a fruit market and buys 5 apples. The price of each apple is \$1.05. He pays with 20 dollars. Calculate his change.

- 10) Cody bought 3 model cars at the toy store. If each model costs \$5.70 and he pays with 20 dollars, how much change will he receive?
