

**Solve each problem.****Answers**

- 1) Debby uploaded four pictures from her phone and two from her camera to Facebook. If she sorted the pics into three different albums with the same amount of pics in each album, how many pictures were in each of the albums?
- 2) For homework Robin had thirteen math problems and thirty-five spelling problems. If she can finish six problems in an hour how long will it take her to finish all the problems?
- 3) The school's baseball team had twenty-six new players and nineteen returning players. If the coach put them into groups with five players in each group, how many groups would there be?
- 4) A vase can hold six flowers. If you had twelve carnations and thirty roses, how many vases would you need to hold the flowers?
- 5) While playing at the arcade, Will won twelve tickets playing 'whack a mole' and twelve tickets playing 'skee ball'. If he was trying to buy candy that cost three tickets a piece, how many could he buy?
- 6) The school's debate team had twelve boys and nine girls on it. If they were split into groups of seven how many groups could they make?
- 7) For a birthday party Paul bought forty-one regular sodas and four diet sodas. If his fridge would only hold nine on each shelf, how many shelves would he fill up?
- 8) For Halloween Lana received five pieces of candy from neighbors and ten pieces from her older sister. If she only ate three pieces a day, how long would the candy last her?
- 9) Janet and her friends were recycling paper for their class. For every seven pounds they recycled they earned 1 point. If Janet recycled thirteen pounds and her friends recycled twenty-two pounds, how many points did they earn?
- 10) Amy was making baggies of cookies with eight cookies in each bag. If she had thirty-eight chocolate chip cookies and ten oatmeal cookies, how many baggies could she make?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
