

**Solve each problem.****Answers**

- 1) Billy started his own lawn mowing business. In the spring he made thirty-five dollars mowing lawns and in the summer he made forty-six dollars. If he had to spend seventy-five dollars buying supplies, how much money did he end up with?
- 2) There were fifty girls and twenty-nine boys trying out for the school's basketball team. If only twenty-seven of them got called back, how many students didn't make the cut?
- 3) Paul had eleven dollars. For his birthday he got forty-two more dollars but spent eleven on a new game. How much money does he have now?
- 4) Haley had twenty-two math problems and two science problems for homework. If she finished twenty-one of the problems at school, how many problems did she have to do for homework?
- 5) Gwen had forty-seven music files and forty-three video files on her flash drive. If she deleted thirty-one of the files, how many files were still on her flash drive?
- 6) At the school's book fair Victor bought twenty-four adventure books and nine mystery books. If twenty-nine of the books were used, how many new books did he buy?
- 7) A pet store had forty-two siamese cats and thirty-two house cats. During a sale they sold eighteen cats. How many cats do they have left?
- 8) While shopping, Debby bought twenty-one green towels and thirty white towels. If she gave her mother thirty-six of them, how many towels did Debby end up with?
- 9) A waiter at 'The Greasy Spoon' restaurant had forty-one customers to wait on. During the lunch rush he added another four customers. If thirty of the customers didn't leave him a tip, how many customers did leave a tip?
- 10) Cody was trying to expand his game collection. He bought twenty-five games from a friend and bought six more at a garage sale. If twenty-two of the games didn't work, how many good games did he end up with?
