

**Solve each problem.****Answers**

- 1) Tiffany had five music files and twenty-four video files on her flash drive. If she deleted seven of the files, how many files were still on her flash drive?
- 2) There were forty-seven girls and twenty-eight boys trying out for the school's basketball team. If only thirty-six of them got called back, how many students didn't make the cut?
- 3) At the arcade, Oliver won thirty-nine tickets playing 'whack a mole' and forty-two tickets playing 'skee ball'. If he spent fifty-six of his tickets on a hat, how many tickets does Oliver have left?
- 4) Katie picked four tulips and forty-three roses to make flower bouquets. If she only used eighteen of the flowers though, how many extra flowers did Katie pick?
- 5) While on vacation, Faye took twenty-two pictures at the zoo and eleven at the museum. If she later deleted twenty-five of the pictures, how many pictures from her vacation did she still have?
- 6) For Halloween Nancy and her sister combined the candy they received. Nancy had fifteen pieces of candy while her sister had forty-five. If they ate forty-eight pieces the first night, how many pieces do they have left?
- 7) Tom had forty-one dollars. For his birthday he got eighteen more dollars but spent twenty on a new game. How much money does he have now?
- 8) The school cafeteria ordered six red apples and two green apples for student's lunches. But, if only five students wanted fruit, how many extra did the cafeteria end up with?
- 9) Sam was trying to expand his game collection. He bought four games from a friend and bought thirty-seven more at a garage sale. If four of the games didn't work, how many good games did he end up with?
- 10) Olivia bought two coloring books. One had forty pictures and the other had thirty-two. After one week she had already colored thirty-eight of the pictures. How many pictures does she still have to color?

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
