Two Step Problems

Name:

Solve each problem.

1) At the fair Mike bought eight tickets. After riding the ferris wheel he had three tickets left. If each ticket cost seven dollars, how much money did Mike spend riding the ferris wheel?

1. _____

2. _____

2) At a restaurant each adult meal costs $7 and kids eat free. If a group of five people came in and two were kids, how much would it cost for the group to eat?

3. _____

4. _____

3) In a video game, each enemy defeated gives you five points. If a level has nine enemies total and you destroy all but two of them, how many points would you earn?

5. _____

6. _____

4) A chef needs eleven potatoes for a meal. He has already cooked five. If each potato takes eight minutes to cook, how long will it take him to cook the rest?

7. _____

8. _____

5) Olivia baked seven brownies, but needed twelve total for her party. If she used two spoonfuls of flour on each one, how much cups of flour does she still need?

9. _____

10. _____

6) Edward had eight action figures, but needed sixteen total for a complete collection. If each one costs $9, how much money would he need to finish his collection?

7) A painter needed to paint twelve rooms in a building. Each room takes two hours to paint. If he already painted seven rooms, how much longer will he take to paint the rest?

8) Dave bought ten boxes of chocolate candy and gave four to his little brother. If each box has two pieces inside it, how many pieces did Dave still have?

9) A new building needed sixteen windows. The builder had already installed seven of them. If it takes five hours to install each window, how long will it take him to install the rest?

10) Bianca earned four points for each bag of cans she recycled. If she had seventeen bags, but didn't recycle eight of them, how many points would she have earned?

Solve each problem.
