	Examining Two Values Relative Size Name:			
Solve each problem.				
1)	Given the numbers 75 and 43, how much would you need to subtract from the larger number to make it even with the smaller number?	1		
2)	Given the numbers 76 and 42, how much would you need to subtract from the larger number to make it even with the smaller number?	2		
3)	Given the numbers 20 and 30, how much would you need to subtract from the larger number to make it even with the smaller number?	4		
4)	Given the numbers 78 and 75, how much would you need to add to the smaller number to make it greater than the larger number?	5.		
5)	Given the numbers 26 and 34, how much would you need to add to the smaller number to make it greater than the larger number?	7		
6)	Given the numbers 9 and 12, how much would you need to subtract from the larger number to make it even with the smaller number?	9		
7)	Given the numbers 65 and 22, how much would you need to subtract from the larger number to make it even with the smaller number?	10. 11.		
8)	Given the numbers 96 and 67, how much would you need to add to the smaller number to make it even with the larger number?	12		
9)	Given the numbers 91 and 70, how much would you need to subtract from the larger number to make it even with the smaller number?			
10)	Given the numbers 35 and 50, how much would you need to subtract from the larger number to make it less than the smaller number?			
11)	Given the numbers 92 and 16, how much would you need to add to the smaller number to make it even with the larger number?			
12)	Given the numbers 93 and 19, how much would you need to add to the smaller number to make it greater than the larger number?

	Examining Two Values Delative Size	swor Koy
 Solv	e each problem.	Answers
1)	Given the numbers 75 and 43, how much would you need to subtract from the larger number to make it even with the smaller number?	1. <u>32</u>
2)	Given the numbers 76 and 42, how much would you need to subtract from the larger number to make it even with the smaller number?	2. <u>34</u> 2. <u>10</u>
3)	Given the numbers 20 and 30, how much would you need to subtract from the larger number to make it even with the smaller number?	4. <u>4</u>
4)	Given the numbers 78 and 75, how much would you need to add to the smaller number to make it greater than the larger number?	5. <u>9</u> 6. <u>3</u>
5)	Given the numbers 26 and 34, how much would you need to add to the smaller number to make it greater than the larger number?	7. <u>43</u> 8. <u>29</u>
6)	Given the numbers 9 and 12, how much would you need to subtract from the larger number to make it even with the smaller number?	9. <u>21</u>
7)	Given the numbers 65 and 22, how much would you need to subtract from the larger number to make it even with the smaller number?	10. 10 11. 76
8)	Given the numbers 96 and 67, how much would you need to add to the smaller number to make it even with the larger number?	12. 75
9)	Given the numbers 91 and 70, how much would you need to subtract from the larger number to make it even with the smaller number?	
10)	Given the numbers 35 and 50, how much would you need to subtract from the larger number to make it less than the smaller number?	
11)	Given the numbers 92 and 16, how much would you need to add to the smaller number to make it even with the larger number?	
12)	Given the numbers 93 and 19, how much would you need to add to the smaller number to make it greater than the larger number?
